JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Acidic zeolites
Flash vacuum pyrolysis (FVP) on zeolites: Pyrolysis of 5-β(hydroxyethyl)-5H-dibenzo[*a*,*d*]cycloheptene, 177
Aldehydes
Cannizzaro reaction of aldehydes in TMAH thermochemolysis, 21
Almond shells
Pyrolysis kinetics of almond shells and olive stones considering their organic fractions, 159

Benzo[*a*]fluorene
Flash vacuum pyrolysis (FVP) on zeolites: Pyrolysis of 5-β(hydroxyethyl)-5H-dibenzo[*a*,*d*]cycloheptene, 177
Benzo[*c*]fluorene
Flash vacuum pyrolysis (FVP) on zeolites: Pyrolysis of 5-β(hydroxyethyl)-5H-dibenzo[*a*,*d*]cycloheptene, 177
Biomass
Kinetic modeling of biomass pyrolysis, 73
Bi(Pb)-Sr-Ca-Cu-O
Variations in the chemical composition of Bi(Pb)-Sr-Ca-Cu-O films deposited by spray pyrolysis method, 89
By-products
Investigation of the thermal decomposition of selected *N*,*N*-dialkylamides at low temperature, 53

Cannizzaro reaction
Cannizzaro reaction of aldehydes in TMAH thermochemolysis, 21
Carbon isotope
Characterization of tetramethylammonium hydroxide thermochemolysis products of near-shore marine sediments using gas chromatography/mass spectrometry and gas chromatography/combustion/isotope ratio mass spectrometry, 135
Cellulose
Kinetic modeling of biomass pyrolysis, 73
β-Cyclodextrin
The investigation of pyrolysis mechanism of heptakis[3-*O*-methyl-2,6-di-*O*-(methoxybenzyl)]-β-cyclodextrin by Py-GC and Py-GC/MS, 9

Dearomatization
Hydropyrolysis of pretreated high-boiling hydrocarbon fractions, 113
Degradation
The effect of isomerization and degradation of polyunsaturated fatty acids from oils by different volume proportions of tetramethylammonium hydroxide in thermally assisted hydrolysis and methylation, 1
Derivatisation
The effect of isomerization and degradation of polyunsaturated fatty acids from oils by different volume proportions of tetramethylammonium hydroxide in thermally assisted hydrolysis and methylation, 1
Dibenzo(C_9H_{10})hydrocarbons
Flash vacuum pyrolysis (FVP) on zeolites: Pyrolysis of 5-β(hydroxyethyl)-5H-dibenzo[*a*,*d*]cycloheptene, 177
DSC
Kinetic modeling of biomass pyrolysis, 73

EDX analysis
Variations in the chemical composition of Bi(Pb)-Sr-Ca-Cu-O films deposited by spray pyrolysis method, 89
Enzyme digestion
The effect of enzymatic removal of proteins from plant leaf material as studied by pyrolysis-mass spectrometry: detection of additional protein marker fragment ions, 33
Ethene
Mass and microwave spectroscopic studies of the pyrolysates of bicyclo[2.2.1]hept-2-ene and its derivatives, 203

Extractant
Investigation of the thermal decomposition of selected *N,N*-dialkylamides at low temperature, 53

Flash vacuum pyrolysis
Flash vacuum pyrolysis (FVP) on zeolites: Pyrolysis of 5-β(hydroxyethyl)-5H-dibenzo[*a,d*]cycloheptene, 177

Gas chromatography
The effect of isomerization and degradation of polyunsaturated fatty acids from oils by different volume proportions of tetramethylammonium hydroxide in thermally assisted hydrolysis and methylation, 1
Gas chromatography/combustion/isotope ratio mass spectrometry
Characterization of tetramethylammonium hydroxide thermochemolysis products of near-shore marine sediments using gas chromatography/mass spectrometry and gas chromatography/combustion/isotope ratio mass spectrometry, 135
Gas chromatography/mass spectrometry
Characterization of tetramethylammonium hydroxide thermochemolysis products of near-shore marine sediments using gas chromatography/mass spectrometry and gas chromatography/combustion/isotope ratio mass spectrometry, 135
GC/FTIR
Investigation of the thermal decomposition of selected *N,N*-dialkylamides at low temperature, 53
GC/MS
Investigation of the thermal decomposition of selected *N,N*-dialkylamides at low temperature, 53
Grasses
The effect of enzymatic removal of proteins from plant leaf material as studied by pyrolysis-mass spectrometry: detection of additional protein marker fragment ions, 33

Heavy oil fractions
Hydropyrolysis of pretreated high-boiling hydrocarbon fractions, 113
Hemicellulose
Kinetic modeling of biomass pyrolysis, 73
Hydropretreatment
Hydropyrolysis of pretreated high-boiling hydrocarbon fractions, 113
Hydropyrolysis
Hydropyrolysis of pretreated high-boiling hydrocarbon fractions, 113

ICP-AES analysis
Variations in the chemical composition of Bi(Pb)-Sr-Ca-Cu-O films deposited by spray pyrolysis method, 89
Isocyanic acid
Mass and microwave spectroscopic studies of the pyrolysates of bicyclo[2.2.1]hept-2-ene and its derivatives, 203
Isomerization
The effect of isomerization and degradation of polyunsaturated fatty acids from oils by different volume proportions of tetramethylammonium hydroxide in thermally assisted hydrolysis and methylation, 1

Lignin
Cannizzaro reaction of aldehydes in TMAH thermochemolysis, 21
Characterization of tetramethylammonium hydroxide thermochemolysis products of near-shore marine sediments using gas chromatography/mass spectrometry and gas chromatography/combustion/isotope ratio mass spectrometry, 135
Kinetic modeling of biomass pyrolysis, 73
The effect of enzymatic removal of proteins from plant leaf material as studied by pyrolysis-mass spectrometry: detection of additional protein marker fragment ions, 33
Lignocellulosic materials
The influence of the percentage of oxygen in the atmosphere on the thermal decomposition of lignocellulosic materials, 189
Lipid
Characterization of tetramethylammonium hydroxide thermochemolysis products of near-shore marine sediments using gas chromatography/mass spectrometry and gas chromatography/combustion/isotope ratio mass spectrometry, 135
Liquid crystalline polysiloxane
The Py-GC and Py-GC/MS investigation of liquid crystalline polysiloxanes containing benzyl ether and biphenyl mesogen, 103
Liquid crystals
The Py-GC and Py-GC/MS investigation of liquid crystalline polysiloxanes containing benzyl ether and biphenyl mesogen, 103

Marine sediments
Characterization of tetramethylammonium hydroxide thermochemolysis products of near-shore marine sediments using gas chromatography/mass spectrometry and gas chromatography/combustion/isotope ratio mass spectrometry, 135
Mass spectrometry
Mass and microwave spectroscopic studies of the pyrolysates of bicyclo[2.2.1]hept-2-ene and its derivatives, 203
Methylallene
Mass and microwave spectroscopic studies of the pyrolysates of bicyclo[2.2.1]hept-2-ene and its derivatives, 203
Methyl vinyl ketone
Mass and microwave spectroscopic studies of the pyrolysates of bicyclo[2.2.1]hept-2-ene and its derivatives, 203
Microwave spectroscopy
Mass and microwave spectroscopic studies of the pyrolysates of bicyclo[2.2.1]hept-2-ene and its derivatives, 203

N,N-dialkylamide
Investigation of the thermal decomposition of selected *N,N*-dialkylamides at low temperature, 53

Oils
The effect of isomerization and degradation of polyunsaturated fatty acids from oils by different volume proportions of tetramethylammonium hydroxide in thermally assisted hydrolysis and methylation, 1
Olive stones
Pyrolysis kinetics of almond shells and olive stones considering their organic fractions, 159
Oxygen influence
The influence of the percentage of oxygen in the atmosphere on the thermal decomposition of lignocellulosic materials, 189

Particle morphology
Texture and morphology of titania particles prepared by vapor-phase pyrolysis of titanium tetra-isopropoxide, 123
Pine sawdust
The influence of the percentage of oxygen in the atmosphere on the thermal decomposition of lignocellulosic materials, 189
Plant cell components
The effect of enzymatic removal of proteins from plant leaf material as studied by pyrolysis-mass spectrometry: detection of additional protein marker fragment ions, 33
Poa spp
The effect of enzymatic removal of proteins from plant leaf material as studied by pyrolysis-mass spectrometry: detection of additional protein marker fragment ions, 33
Polyunsaturated fatty acid
The effect of isomerization and degradation of polyunsaturated fatty acids from oils by different volume proportions of tetramethylammonium hydroxide in thermally assisted hydrolysis and methylation, 1
Pronase
The effect of enzymatic removal of proteins from plant leaf material as studied by pyrolysis-mass spectrometry: detection of additional protein marker fragment ions, 33
Protein
The effect of enzymatic removal of proteins from plant leaf material as studied by pyrolysis-mass spectrometry: detection of additional protein marker fragment ions, 33
Pyrolysis
Cannizzaro reaction of aldehydes in TMAH thermochemolysis, 21
Hydropyrolysis of pretreated high-boiling hydrocarbon fractions, 113
Investigation of the thermal decomposition of selected *N,N*-dialkylamides at low temperature, 53
Kinetic modeling of biomass pyrolysis, 73
Texture and morphology of titania particles prepared by vapor-phase pyrolysis of titanium tetra-isopropoxide, 123
The effect of isomerization and degradation of polyunsaturated fatty acids from oils by different volume proportions of tetramethylammonium hydroxide in thermally assisted hydrolysis and methylation, 1
Pyrolysis gas chromatography
The investigation of pyrolysis mechanism of heptakis[3-*O*-methyl-2,6-di-*O*-(methoxybenzyl)]-β-cyclodextrin by Py-GC and Py-GC/MS, 9
The Py-GC and Py-GC/MS investigation of liquid crystalline polysiloxanes containing benzyl ether and biphenyl mesogen, 103
Pyrolysis kinetics
Pyrolysis kinetics of almond shells and olive stones considering their organic fractions, 159
Pyrolysis mass spectrometry
The effect of enzymatic removal of proteins from plant leaf material as studied by pyrol-

ysis-mass spectrometry: detection of additional protein marker fragment ions, 33
Pyrolysis-methylation
Cannizzaro reaction of aldehydes in TMAH thermochemolysis, 21

Reaction kinetics
Kinetic modeling of biomass pyrolysis, 73
Reaction pathway
Investigation of the thermal decomposition of selected *N,N*-dialkylamides at low temperature, 53

Spray pyrolysis
Variations in the chemical composition of Bi(Pb)-Sr-Ca-Cu-O films deposited by spray pyrolysis method, 89
s-trans-Acrolein
Mass and microwave spectroscopic studies of the pyrolysates of bicyclo[2.2.1]hept-2-ene and its derivatives, 203
Surface texture
Texture and morphology of titania particles prepared by vapor-phase pyrolysis of titanium tetra-isopropoxide, 123

Tetramethylammonium hydroxide
Cannizzaro reaction of aldehydes in TMAH thermochemolysis, 21
Characterization of tetramethylammonium hydroxide thermochemolysis products of near-shore marine sediments using gas chromatography/mass spectrometry and gas chromatography/combustion/isotope ratio mass spectrometry, 135
The effect of isomerization and degradation of polyunsaturated fatty acids from oils by different volume proportions of tetramethylammonium hydroxide in thermally assisted hydrolysis and methylation, 1
Thermal decomposition
The influence of the percentage of oxygen in the atmosphere on the thermal decomposition of lignocellulosic materials, 189
Thermal degradation
Investigation of the thermal decomposition of selected *N,N*-dialkylamides at low temperature, 53
Thermal oxidation
Investigation of the thermal decomposition of selected *N,N*-dialkylamides at low temperature, 53
Thermochemolysis
Characterization of tetramethylammonium hydroxide thermochemolysis products of near-shore marine sediments using gas chromatography/mass spectrometry and gas chromatography/combustion/isotope ratio mass spectrometry, 135
Thermogravimetry
Kinetic modeling of biomass pyrolysis, 73
Thin films
Variations in the chemical composition of Bi(Pb)-Sr-Ca-Cu-O films deposited by spray pyrolysis method, 89
Titania
Texture and morphology of titania particles prepared by vapor-phase pyrolysis of titanium tetra-isopropoxide, 123
Titanium tetra-isopropoxide
Texture and morphology of titania particles prepared by vapor-phase pyrolysis of titanium tetra-isopropoxide, 123
TMAH thermochemolysis
Cannizzaro reaction of aldehydes in TMAH thermochemolysis, 21
